PRACTICAL CLINICAL COURSES

**PROCEDURE FOR RECEIVING
CE CREDIT FOR VIDEO COURSES**

1. Complete the enclosed Post-Test.* For each **CE Video Purchased**, one complimentary test is included. Additional tests are \$35/person per test. Fees can be paid by check or with a credit card when submitting tests to Practical Clinical Courses. If more than 10 CE tests are required per video, please contact us at 800-223-6569.
2. Complete the demographic information located at the end of the test.
Type of Credit:
 - a. If the applicant selects "State," PCC will issue a certificate of verification to the applicant. The applicant must then submit this certificate to their state board to obtain credit.
 - b. If the applicant selects "AGD," PCC will submit credit information to the Academy of General Dentistry and confirmation to the applicant that it has been submitted (*the applicant may check their AGD transcript for verification – please allow 30 days*).
 - c. If the applicant selects "Both," PCC will complete a. & b. above.
3. Return the **Post-Test portion** via mail, fax, or email. Our contact information is as follows:

Practical Clinical Courses
3707 N Canyon Road
Suite 3D
Provo, UT 84604
Fax: (801) 226-8637
cetests@pccdental.com

4. Practical Clinical Courses will correct the Post-Test. **Passing scores are 70% or higher.**

***TO OBTAIN CE CREDIT ONLINE:** Login or create an account on www.pccdental.com and select "My CE Tests" from the left-side menu. Click on the video title to take the test online. **RESULTS ARE IMMEDIATE.** Missing the test? Contact us at 800-223-6569 during our business hours of 7:00 a.m. – 4:00 p.m. MST to add it to your account.

PROGRAM

V2549 Making Complete Dentures a “Win-Win” Service

CLINICIAN RESPONSIBLE:

Gordon J. Christensen, DDS, MSD, PhD
Founder and CEO, Practical Clinical Courses
Senior Consultant & Previous CEO, CR Foundation
Practicing Prosthodontist, Provo, Utah

GOALS & OBJECTIVES

On completion of this video, viewers should be able to:

1. Discuss the need for complete dentures at this time.
2. Describe some reasons for the apparent low interest in complete dentures expressed by some dentists.
3. Discuss the desirability of implant supported overdentures in some patients.
4. Describe why some denture fees are much higher than the national average.
5. List some ways in which staff persons can be involved in the complete denture procedure.
6. List the appointments for fabrication of complete dentures explained in this presentation.
7. Discuss the importance of adequate patient education when providing complete dentures for patients.
8. Explain important psychology concepts to help patients accept complete dentures.
9. Describe the diagnostic appointment.
10. Explain why custom impression trays are probably better than stock trays for final impressions.
11. Describe a preliminary final impression.
12. List the characteristics of an adequate custom final impression tray.
13. List the steps in making stabilized occlusion rims for complete dentures.
14. List the steps in determining the correct vertical dimension of occlusion.
15. Describe use of a Fox occlusal plane.
16. List the important psychological aspects when trying-in a trial denture.
17. List methods and supplies to ensure adequate patient comfort when seating complete dentures.
18. Describe the steps suggested when seating complete dentures.
19. List the materials suggested for evaluating and correcting occlusion for complete dentures.
20. List several clinical tips described in this presentation to help to ensure clinical success when placing complete dentures.

OVERVIEW

V2549 Making Complete Dentures a “Win-Win” Service

This presentation on complete dentures includes the following information:

- Need for complete dentures
- Reasons for low dentist interest in removable prosthodontics
- Importance of implant support and retention for complete dentures
- Types of implant support for complete dentures
- Fees for complete dentures
- Staff involvement with complete dentures
- Typical appointments for complete denture fabrication
- Educating patients about complete dentures
- Psychology related to increasing patient acceptance of complete dentures
- Diagnostic appointment and preliminary impressions
- Importance of dentist-laboratory interaction in complete dentures
- Impression trays for final impressions
- Preliminary final impressions and border molding
- Final impressions
- Stabilized occlusion rims, “bite blocks”
- Determining vertical dimension of occlusion, “centric jaw relation”
- Trial denture try-in
- Seating dentures
- Denture adjustments

All steps in the denture fabrication technique are shown in detail to afford viewers the opportunity to determine which techniques should be incorporated into their practices.

POST-TEST

V2549 Making Complete Dentures a “Win-Win” Service

1. Implant supported overdentures provide:
 - a. improved retention.
 - b. improved support.
 - c. improved patient acceptance.
 - d. all of the above.

2. As suggested in this video, fees for complete dentures can best be kept moderate by:
 - a. combining the vertical dimension of occlusion and final impression appointments.
 - b. using staff persons for many of the clinical procedures.
 - c. buying and using low-cost materials.
 - d. using low-cost resin teeth.

3. The casts from which the trays for final impressions are made are constructed:
 - a. always by a laboratory technician.
 - b. from conventional stone material.
 - c. on the diagnostic appointment.
 - d. on the final impression appointment.

4. Preliminary final impressions are:
 - a. made on the diagnostic appointment.
 - b. always made in vinyl polysiloxane.
 - c. made in alginate.
 - d. none of the above.

5. Preliminary final impressions:
 - a. are lined with polyether.
 - b. are lined with vinyl polysiloxane.
 - c. contain impression material on the borders only.
 - d. are always made by a staff member.

6. Vertical dimension of occlusion for complete dentures:
 - a. can be identified easily.
 - b. can always build out the face to the dentulous appearance.
 - c. is variable and specific to every patient.
 - d. cannot be estimated by jaw positioning during speech.

7. Stabilized occlusion rims were recommended to be made:
 - a. in wax only.
 - b. in acrylic resin.
 - c. using a light-cured thin resin wafer lined with vinyl polysiloxane.
 - d. by dental assistants.

POST-TEST (CONT'D)

V2549 Making Complete Dentures a "Win-Win" Service

- 8 Trying-in the trial denture:
- a. requires special psychological involvement with the patient to ensure their acceptance of the denture.
 - b. is a highly important appointment.
 - c. should usually include staff members as well as the dentist.
 - d. all of the above.
- 9 This presentation suggested _____ appointments excluding the adjustment appointments.
- a. 3
 - b. 4
 - c. 5
 - d. 6
- 10 The need for complete dentures is:
- a. still a major component of oral care.
 - b. reducing.
 - c. not a major part of oral care need.
 - d. far less than in the past.
