**PRACTICAL CLINICAL COURSES**

**PROCEDURE FOR RECEIVING  
CE CREDIT FOR VIDEO COURSES**

1. Complete the enclosed Post-Test.\* For each **CE Video Purchased**, one complimentary test is included. Additional tests are \$35/person per test. Fees can be paid by check or with a credit card when submitting tests to Practical Clinical Courses. If more than 10 CE tests are required per video, please contact us at 800-223-6569.
2. Complete the demographic information located at the end of the test.  
**Type of Credit:**
  - a. If the applicant selects "State," PCC will issue a certificate of verification to the applicant. The applicant must then submit this certificate to their state board to obtain credit.
  - b. If the applicant selects "AGD," PCC will submit credit information to the Academy of General Dentistry and confirmation to the applicant that it has been submitted (*the applicant may check their AGD transcript for verification – please allow 30 days*).
  - c. If the applicant selects "Both," PCC will complete a. & b. above.
3. Return the **Post-Test portion** via mail, fax, or email. Our contact information is as follows:

**Practical Clinical Courses**  
**3707 N Canyon Road**  
**Suite 3D**  
**Provo, UT 84604**  
**Fax: (801) 226-8637**  
[cetests@pccdental.com](mailto:cetests@pccdental.com)

4. Practical Clinical Courses will correct the Post-Test. **Passing scores are 70% or higher.**

**\*TO OBTAIN CE CREDIT ONLINE:** Login or create an account on [www.pccdental.com](http://www.pccdental.com) and select "My CE Tests" from the left-side menu. Click on the video title to take the test online. **RESULTS ARE IMMEDIATE.** Missing the test? Contact us at 800-223-6569 during our business hours of 7:00 a.m. – 4:00 p.m. MST to add it to your account.

Gordon J. Christensen Practical Clinical Courses, 3707 North Canyon Road, Suite 3D, Provo, UT 84604  
Toll Free (800) 223-6569 or Utah Residents (801) 226-6569

The techniques and procedures on this videotape are intended to be suggestions only. Any licensed practitioner viewing this presentation must make his or her own professional decisions about specific treatment for patients. PCC is not responsible for any damages or other liabilities (including attorney's fees) resulting, or claimed to result in whole or in part, from actual or alleged problems arising out of the use of this presentation.

## PROGRAM

### **V1992 Rescuing Failing Fixed Prosthodontic and Direct Restorations**

#### CLINICIANS RESPONSIBLE:

**Gordon J. Christensen, DDS, MSD, PhD**  
*Founder and CEO, Practical Clinical Courses*  
*Senior Consultant & Previous CEO, CR Foundation*  
*Practicing Prosthodontist, Provo, Utah*

#### GOALS & OBJECTIVES

At the completion of this video presentation, viewers should be able to:

1. Describe the major challenges observed with failing fixed prosthodontic and direct restorations.
2. Explain the six characteristics of informed consent.
3. State several reasons why zirconia restorations are coming off in service.
4. Compare the failure rate of IPS e.max coming off in service related to zirconia.
5. Describe the method to repair ceramic broken from single tooth porcelain-fused-to-metal restorations.
6. Describe the method to repair ceramic broken from porcelain-fused-to-metal fixed prosthesis restorations.
7. Describe a repair for an open contact area on an amalgam restoration.
8. Describe a repair for an open contact area on a composite restoration.
9. Describe a repair for an open contact on an IPS e.max anterior restoration.
10. Describe a repair for an open contact on an IPS e.max posterior restoration.
11. Describe a repair for an open contact on a zirconia restoration.
12. Discuss a repair for a tooth with a composite restoration on the mesial surface and caries on the distal surface.
13. Describe the technique for restoring an endodontic access hole in a ceramic crown.
14. Describe the technique for restoring a screw access hole in an implant-supported ceramic crown.
15. List the steps to repair a zirconia crown with a significant chip on the facial surface.
16. Discuss repairing a zirconia-based crown with a large fractured MB cusp.
17. Describe how to remove a fixed prosthesis loose on one end.
18. Describe an overcrown.
19. List the steps in taking off a failing zirconia crown.
20. Describe splinting with orthodontic wire or resin-reinforced fibers and composite.

## OVERVIEW

### **V1992 Rescuing Failing Fixed Prosthodontic and Direct Restorations**

Repair of restorative treatment is seldom discussed in dental education, since the students have only a few months of clinical experience and other topics dominate the curricula. The following and other topics are included in this video presentation:

- The major challenges observed with failing fixed prosthodontic and direct restorations
- Six characteristics of informed consent
- Why zirconia restorations are coming off in service
- The failure rate of IPS e.max coming off in service related to zirconia
- The method to repair ceramic broken from single tooth porcelain-fused-to-metal restorations
- The method to repair ceramic broken from porcelain-fused-to-metal fixed prosthesis restorations
- Repair for an open contact area on an amalgam restoration
- Repair for an open contact area on a composite restoration
- Repair for an open contact on an IPS e.max anterior restoration
- Repair for an open contact on an IPS e.max posterior restoration
- Repair for an open contact on a zirconia restoration
- Repair for a tooth with a composite restoration on the mesial surface and caries on the distal surface
- The technique for restoring an endodontic access hole in a ceramic crown
- The technique for restoring a screw access hole in an implant-supported ceramic crown
- The steps to repair a zirconia crown with a significant chip on the facial surface
- Repairing a zirconia-based crown with a large fractured MB cusp
- How to remove a fixed prosthesis loose on one end
- What is an overcrown
- The steps in taking off a failing zirconia crown
- Splinting mobile teeth with orthodontic wire or resin-reinforced fibers and composite

## POST-TEST

### **V1992 Rescuing Failing Fixed Prosthodontic and Direct Restorations**

1. Informed consent:
  - a. requires only informing the patient of what happens if you do nothing.
  - b. is not necessary for repair procedures since many are transitional.
  - c. includes 6 requirements.
  - d. includes 5 requirements.
  
2. Zirconia crowns:
  - a. of generation 1 are very strong.
  - b. can come off frequently during service.
  - c. are not easy to cut off preps.
  - d. all of the above.
  
3. Ceramic broken off a PFM single crown:
  - a. requires an overcrown.
  - b. can often be provisionally repaired with a composite bonded restoration.
  - c. should always have a new crown.
  - d. usually causes pulpal damage.
  
4. IPS e.max restorations:
  - a. come off frequently in service.
  - b. segregate at the tooth-cement interface, when they come off.
  - c. require an MDP primer for repair.
  - d. do not require a silane primer for repair.
  
5. Ceramic broken off a multi-unit fixed prosthesis:
  - a. can be repaired best with a bonded resin.
  - b. can be repaired best with an overcrown.
  - c. does not need an MDP primer when using an overcrown.
  - d. when repaired with an overcrown, is NOT a long-term service.
  
6. Restoring an endodontic access hole in an IPS e.max crown:
  - a. is usually a long-term repair.
  - b. should have patient informed consent about the potential of later failure.
  - c. usually does not require an opaquer agent.
  - d. requires an MDP primer.
  
7. Closing an open contact on a posterior zirconia restoration:
  - a. usually does not require a new crown.
  - b. is capable of being repaired long-term with a composite bonded to the zirconia.
  - c. is not usually a problem for the patient.
  - d. all the above are false.

**POST-TEST (CONT'D)**

**V1992 Rescuing Failing Fixed Prosthodontic and Direct Restorations**

- 8. A fixed partial denture loose on one end:
  - a. should always be removed and remade.
  - b. can usually not be removed and recemented.
  - c. can be removed and cemented with a light-cured cement.
  - d. can be removed and recemented with a dual- or auto-cure cement.
  
- 9. Splinting mobile anterior teeth:
  - a. is usually a difficult procedure.
  - b. can be done with a wire or fiber-reinforced composite splint.
  - c. usually requires splinted crowns.
  - d. has to be an expensive procedure.
  
- 10. A product suggested for filling the screw-tightening holes in implants is:
  - a. MDP primer.
  - b. silane.
  - c. Liquid Magic.
  - d. tin foil.
